ICSFT denounces the escalation of aggression against Yemen

The war on Yemen has been rising steadily in recent times. Saudi - United Arab Emirates coalition forces are carrying out extremely violent attacks on civilian targets in Yemen's capital, Sana'a, in addition to various Yemeni areas, and have left dozens of people dead and wounded.

The claims of the Coalition of Aggression that these raids and attacks are in response to attacks that have affected some areas of the United Arab Emirates are merely desperate attempts to cover up the massacres committed against Yemen for many years.

Since the start of the aggression against Yemen, the toll has been increasing day by day, with more than 377,000 victims, according to United Nations statistics, by the end of 2021. This number includes victims of direct hostilities as well as victims of indirect conflict from famine, diseases, epidemics, etc. This number also includes children, women and elderly victims throughout Yemeni territory.

The ICSFT condemns in the strongest terms the ongoing aggression against the Yemeni people and calls upon the States members of the Human Rights Council to put pressure on the States of the Alliance of Aggression to stop their attacks on Yemen immediately.

The ICSFT also appeals to all international and civil rights organizations, legal activists to fulfil their responsibilities, expose the brutal aggression against Yemen, and expose the systematic destruction to which Yemen is subjected at all levels.

The ICSFTs also affirm that this aggression constitutes a grave breach of all international human rights and humanitarian law and constitutes a grave violation of human rights in general and of the Yemeni people in particular.
